Excel Assignment 1 - Data Exploration

Project Title: Excel Assignment 1 - Data Exploration

Objective: To explore the given Ecommerce Sales dataset using Excel and understand the data structure, patterns and basic insights.

Dataset Used: Ecommerce_Sales_Dataset_updated.xlsx

Work Done:

1. Opened the dataset and checked columns - Order ID, Date, Product, Category, Quantity, Price, Region, Sales.
2. Cleaned the data - removed duplicates and blank rows.
3. Used Filters, Sorting, Freeze Panes.
4. Used Formulas - SUM, AVERAGE, COUNT, COUNTIF, SUMIF, MAX, MIN.
5. Used Data Exploration - Checked total rows, total sales, unique products, unique regions.
6. Created Pivot Table and Charts to see sales by Category and Region.

Key Findings: Total sales, top category, top region and sales trend found through exploration.

Tools Used: Microsoft Excel
